

Mitel 6390 & 6392 Analog Telephones

Affordable, feature-rich enterprise-grade analog phones that are easy to use with a professional, modern, sleek design

Key Features

- Large backlit LCD display
- Modern sleek design
- Easy-to-use User Interface
- 1 and 2-Line Models
- Message Waiting Indicator
- Missed Call Indicator
- Headset support
- Hands-free speakerphone
- Programmable Feature Key delivering: Do Not Disturb, Call Forwarding, Voicemail
- Administrator features that facilitate installation
- Emergency calling features from line

The Mitel 6390 series of analog phones deliver the latest advanced enterprise-grade productivity-enhancing features, in addition to all of the traditional analog phone features, through handsets that connect seamlessly to the analog extensions of your business communication system.

The Mitel 6390 and 6392 analog phones are the ideal fit for any SMB or Enterprise business with a modern, sleek design that reflects today's office environment.

Program the memory keys with frequently called numbers or feature codes. Enhance productivity by creating your own personalized directory, so that your business contacts are always available for fast and easy dialing.

Easily access your recent incoming and outgoing calls with the customizable call logs.

Available in two models – both models feature a similar user interface, feature set, and configuration process. The Mitel 6392 additionally delivers 2 lines with all of the features associated with a two-line phone, such as conferencing and for each line.
